3. Hardware Installation

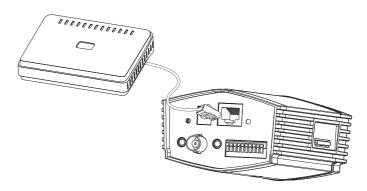

Basic Connection (without PoE)

Connect the camera to your switch or router via Ethernet cable. Connect the supplied power cable from the camera to a power outlet.

Connection Using a PoE Switch

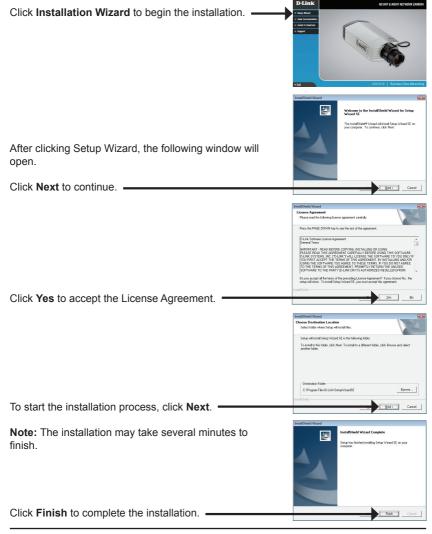

If using a PoE switch or router, connect the network camera via Ethernet cable. PoE will transmit both power and data over a single cable.

Note: Once power has been established, the LED will turn red. When the device has obtained an IP address and is accessible, the LED will turn green.

4. Configuration with Wizard

Insert the DCS-3112 CD into your computer's CD-ROM drive to begin the installation. If the Autorun function on your computer is disabled, or if the D-Link Launcher fails to start automatically, click **Start > Run**. Type **D:\autorun.exe**, where D: represents the drive letter of your CD-ROM drive.

Click on the **D-Link Setup Wizard SE** icon that was created in your Windows Start menu.

Start > D-Link > Setup Wizard SE

The Setup Wizard will appear and display the MAC address and IP address of your camera(s). If you have a DHCP server on your network, a valid IP Address will be displayed. If your network does not use a DHCP server, the network camera's default static IP 192.168.0.20 will be displayed.

Click the Wizard button to continue
