Package Contents

DWA-121 Wireless N 150 Pico USB Adapter

CD with drivers and documentation

If any of the above items are missing, please contact your reseller.

System Requirements

- A desktop computer with an available USB slot
- Windows® 7, Windows Vista® (32/64-bit), XP (32/64-bit with Service Pack 3 or higher), and Linux
- 300MHz processor and at least 64MB of RAM

DWA-121

What This Product Does

The D-Link Wireless N 150 Pico USB Adapter (DWA-121) is an 802.11n client device that delivers unrivaled wireless performance for your desktop computer. Once connected, access your network's high-speed Internet connection while sharing photos, files, music, video, printers, and storage.

Before You Begin

Before installing your new D-Link wireless adapter, please verify the following:

- Remove any previous installations of wireless adapters.
- Disable any built-in wireless adapters.
- Verify the settings such as the wireless network name (SSID) and security settings of the network(s) you want to connect to.

Note: If you have installed a different manufacturer's adapter or a different model D-Link adapter, make sure the software is uninstalled before installing the new software. Some utilities may cause a conflict with the new software. Windows® 7, Windows Vista® and XP users may use the built-in wireless utility.

Installation

Step 1:

Turn on the computer and insert the D-Link DWA-121 Driver CD in the CD-ROM drive. If the CD Autorun function does not automatically start on your computer, go to **Start > Run**. In the run box type "**D:\Autorun.exe**" (where **D:** represents the drive letter of your CD-ROM drive).

Step 2:

When the installation screen appears, click Install Drivers and follow the on- screen instructions to install and configure your wireless adapter.

Note: Before installing, write down the serial number and hardware revision (e.g. A1) in case you need to contact technical support.

Step 3:

After installation, the D-Link DWA-121 uses the Wireless Connection Manager as the management software. The manager provides the user an easy interface to change any settings related to the wireless adapter. Clicking on the Wireless Connection Manager icon on the desktop will start the Configuration.

Reminder

Please remove the label from your device and paste in the section below.

Paste your device's label here:

Note: Keep this label for future reference.

Technical Support

Having trouble installing your new product? D-Link's website contains the latest user documentation and software updates for D-Link products. U.S. and Canadian customers can contact D-Link Technical Support through our website or by phone.
