TurboCopy

TurboCopy speeds up file copy operations in Windows.

* TurboCopy works with 32 and 64 bit Windows 7, 32 and 64 bit Vista, and 32 bit Windows XP. Other operating systems are not supported at this time.

* To enable and configure TurboCopy, log in to your PC with Administrator's privileges. Installing or configuring from an account with restricted privileges may not work properly.

Enabling (or Disabling) TurboCopy

1 **Turn on your computer. Log in to an account with administrator privileges.**

2 **Select [Start] - [(All) Programs] - [BUFFALO] - [TurboCopy] - [TurboCopy Enable, Disable].**

If [TurboCopy] is not displayed, install TurboCopy from the software included with this product, or download TurboCopy from www.buffalotech.com and install it.

You can also boot TurboCopy from the Buffalo Tools Launcher.

If Windows 7 displays "Do you want to allow the following program to make changes to this computer?", click [Yes].

If Windows Vista displays "A program needs your permission to continue", click [Continue].

3

This is the current status.

To change the setting, select [Enable] or [Disable].

To keep the current settings without changes, select [Cancel].

Your screen may look slightly different.

Follow the instructions on the screen to configure TurboCopy.

How to Uninstall

To uninstall TurboCopy, follow the steps below.

1 **Turn on your computer, and log in to an account with administrator privileges.**

2 **Select [Start] - [(All) Programs] - [BUFFALO] - [TurboCopy] - [Uninstall].**

Follow the instructions on the screen to uninstall TurboCopy.
