

Quick Installation Guide

IGS-1042GPA

Industrial Unmanaged Gigabit Switch

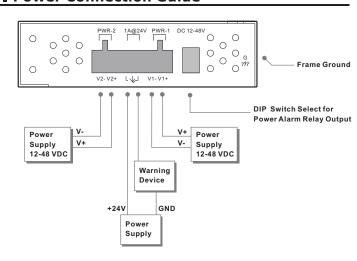

Introduction

IGS-1042GPA is an unmanaged Ethernet switch, with 4x10/100/1000Base-T(X) ports and 2x100/1000Base-X SFP port. The optical network speed of SFP port can be set by changing the settings of the DIP-Switch below. The wide operating temperature range from -40°C to 70°C can satisfy most of operating environment. Therefore, the switch is one of the most reliable choices for Ethernet application.

Features

- > IGS-1042GPA provide 4x10/100/1000Base-T(X) ports
- > SFP port support 100Base-FX and 1000Base-X dual speed
- > Support auto-negotiation and auto-MDI/MDI-X
- > Support store and forward transmission
- > Support flow control
- > Rigid IP-30 housing design
- DIN-Rail and wall mounting enabled

₽ Power Connection Guide

DIP Switch Function

DIP-1	DIP-2	Description
OFF	OFF	Power failure relay alarm disabled
ON	OFF	PWR-1 failure, relay alarm enabled
OFF	ON	PWR-2 failure, relay alarm enabled
ON	ON	PWR-1 or PWR-2 failure, relay alarm enabled

→ Practical Operation

IGS-1042GPA can be used in connecting several Ethernet devices like IP-Camera or other Ethernet devices. In addition, there are two different power inputs at terminal block to avoid interruption caused by power down. When the primary DC power input fails, the backup power input will take over immediately to guarantee a non-stop operation.

Connections of Ethernet devices
